- Practical Applications

-- Planetary Gathering

These days, the Moon and all five planets visible to the naked eye gather in a section of the zodiac occupied by the twelve hexagrams from 27 to 52. This section is above the Western horizon in the evening and so we have the opportunity to actually see this.

The crescent Moon conjuncts Mercury in gate 27 on April 13, Venus in gate 2 on April 14, Mars in gate 20 on April 15, Saturn in gate 35 on April 16 and Jupiter in gate 52 on April 18. It is definitely worthwhile to look skyward after sunset!

-- Audio Sale Completed

Every delay imaginable did happen during the process of transferring the ownership of the audio library, but now it is in its final stage. All the recordings Chaitanyo made of Ra's classes in the US from 1993 to 2000, released and unreleased, are now in the hands of GeneKeys in the UK. You may contact them directly by email if you wish to be on their mailing list: inquiries@genekeys.co.uk.

We thank all of you who have supported this project over the years. We are glad to pass on the task to the new owners, whom we wish every success.

-- Practical Applications
