Bob Dole is a "triple split definition," with a "design to wait." This means that there are three different areas of definition not connected to each other, and that he must wait for the right connections in order to be able to act and manifest in the world.

Bob Dole's chart and overview of his gates and lines. Pages from "Famous Raves, Vol. II," just published by New Sun Services America (see ad on page 4).

Channel 64-47, Abstraction is defined, connecting the Head and Ajna centers, enabling Bob to make sense out of confusion, a design of mental activity and clarity. The natural path for this awareness to express in the Throat is through channel 11-56, Curiosity. His conscious Sun activates gate 56, the Wanderer, "the perpetuation of continuity through the linking of short term activity," in line 3, Alienation, fixed by the Sun. It is looking for its harmonic gate 11, Peace, gate of ideas, which is crucial to but not part of his design. Although he can trust his mental awareness, he is not able to conceptualize his realizations without being conditioned. He

is very susceptible to others' ideas and may express them as his own. People with gate 11 are very stimulating to him.

Bob Dole has 7-31, the channel of leadership defined by Neptune and Mars. This channel defines his identity, his self, the G center. The roles he has by Neptune are unconsciously the Anarchist (7.3) and consciously, the General (7.5). Mars gives him Selectivity (31.3) "to carefully assess and choose the proper influence and to tailor [his] behavior accordingly."

The Alpha channel connects via the Throat center to channel 57-20, Brain Wave, a design of penetrating awareness, his unconscious Saturn disciplining his intuitive clarity and his unconscious Mars in 20, gate of Contemplation in line 4, Application, "Recognition and awareness that can only be trans-

The Planetary Program March – April

When the Sun crosses the equator on its way from the southern to the northern hemisphere and night and day are of equal length everywhere on earth it is spring equinox. This year it is on March 19, a day after the Sun enters gate 25, Innocence, gate of the spirit of the self. This is an annual event, celebrated since ancient times, but this year several factors appear to make it even more remarkable than usual.

The South Node is in gate 51, the Arousing, a gate of the Ego, fueling fierce, competitive, shocking willpower to the Self. With the Sun in harmonic gate 25, the channel of Initiation, a design of needing to be first, gets defined. Not only are Mercury and Venus as usual close to the Sun this year, but also Mars and Saturn. Mars enters gate 25 on March 21, Mercury a day later, and on March 24, about four hours before the Sun leaves, Saturn joins, too: for four hours all four planets conjunct in gate 25 and are harmonic to the South Node in gate 51, with the Sun exalted in line 3, Adaptation "The life-sustaining awareness that thinks on its feet and thus creates opportunities." Certainly a time to be aware of the mechanics, to observe and learn.

Highlighting these dramatic events will be comet Hyakutake, which, according to astronomers, will be visible in the northern sky during the end of March as a fuzzy patch as big as the full moon, peaking around March 26.

While Saturn remains during its entire time in gate 25 (until May 12) in definition with the South Node, first Mercury, then the Sun, and, on April 12, Mars, join the South Node in gate 51 and form now definitions of the same channel with Saturn, now alone in gate 25. Saturn brings discipline and pain. Watch your hearts.

By the end of March, the Earth will join the North Node in the Spleen, beginning its annual April transit of all the Spleen gates. The North Node in gate 57, the Gentle, still defines channel 57-34, Power, a design of the archetype, with Pluto in gate 34. Pluto is in line 4, Triumph right now and retrogrades back into line 3, Machismo for April.

The planetary movements March-April

Jupiter is moving along in the Root, changing from gate 38, Opposition to gate 54, the Marrying Maiden, where it will be until June. See *Health and Human Design* on page 3.

Neptune is now in gate 60, pressuring us to accept limitations in the channel of Mutation both months. Uranus in Root gate 41, Decrease, also conditions us to restrict in order to focus and recognize our feelings.

Enjoy the ride.

Health and Human Design

6. Jupiter at the Root of Health

Human Design shows three different basic energies for health. The hexagrams follow each other in the zodiac:

First is gate 58, The Joyous. As part of the Understanding circuit it concerns the collective.

Second is gate 38, Opposition, part of the Knowing circuit and fuel of the individual struggle for life.

Third is gate 54, The Marrying Maiden, gate of ambition, in the tribal Ego circuit.

All of these three basic energies will be activated by Jupiter this year. Since it takes Jupiter twelve years to go once around the zodiac and activate all gates, the last time this happened was in 1984. It was the time when AIDS entered public consciousness: it spread individually, in the tribe, and globally, collectively. Since then, a new perception of immunity and health has radically changed our behavior.

Between January 20, when Jupiter entered gate 58, and December 10, when it will leave gate 54 for good, Jupiter will move back and forth in the three Root gates: eleven months to give the theme "health" another kick, collectively, tribally, but foremost individually, since Jupiter lingers longest in gate 38.

In this context recall the significance of Uranus in gate 60 (Limitation!). It determines the format of this energy: the healthy measure, that always needs to be found individually. The individual fate of both illness and healing are the basis of tribal and collective evolution.

This time could help the understanding that individual cases of illness require individual care, that there's no such thing as a universal prescription for a given illness.

Remember when Jupiter activates the three fuels in the Root center, that the potentials of reaction are in the harmonic gates of the Spleen (18, 28, 32). Jupiter fixes almost half of their lines.

formed into action in cooperation with those who have the ability to act upon the understanding."

This is a theme for Bob Dole, since he always needs conditioning for "doing." As someone who must wait, he doesn't necessarily have the ability to act with his intuitive clarity. Here is a key to his design, since the two channels involving his leadership and intuition are not powered by a motor, which is necessary to bring things into manifestation and action.

His last channel, also split from the other areas of definition, is 3-60, Mutation. Here he has the Root and Sacral energy pulsating with nowhere to go, the individual energy format of Knowing. He brings the energy to change, mutate and evolve to those around him. This channel grounds him and also allows the unconscious Sun to shine. Note however that his line in gate 3 is 5, Victimization, bringing with it an unalterable sense of being a victim: "When actions designed to overcome confusion alienate others." Note the same themes from both his Suns. The line is fixed by the conscious Earth in Conservatism (60.3) with its "enlightened self-interest that can handle restrictions and limitations."

Bob Dole is very strongly defined with only two centers undefined, the Solar Plexus and the Heart (those centers that are not colored in). The man is not an egoist (undefined Heart center) and can be potentially de-stabilized through emotions (undefined Solar Plexus). He shouldn't identify with the emotional wave, as it is always something that takes him away from what is trustworthy and reliable.

Triple split definitions, though it means that many centers are defined and colored in, have the need to get the bridges to bring the different areas together. This is a specific type of vulnerability. These people fare better in group dynamics, as they have much to contribute but need others for bringing all the parts into a whole. Bob Dole needs gate 11 to bridge the split between his mental definition and the definitions of his Throat. He also has four different gates that could potentially hook up the Sacral/Root energy, his third area of definition, to power and motorize his intuition and well-being.

Pluto has provided this bridge for him the last few years while it was in gate 14 and continues to empower him now in gate 34, making him a "doer." Bob must love Sagittarius energy. He has the harmonic gates to all six Sagittarius gates. Pluto's transit in Sagittarius will be affecting him very directly for the next 12 years.

INDIVIDUAL GATE/LINE OVERVIEWS

Overviews of the gates and lines like the one for Bob Dole on page 1, are available from New Sun Services. They are individually made by Chaitanyo and are a very nice addition to your individual Rave chart, helpful by showing aspects at a glance that otherwise are not easy to see. If your chart has already been calculated, an overview is \$12. For overview plus chart, it is \$22.
